

## Appendix 6: Potentially explosive substances (not limited to the list below)

2-amino-4,6-dinitrophenol (Picramic acid)  
Ammonium perchlorate  
Dibenzoyl peroxide  
Bis(1-hydroxycyclohexyl) peroxide  
Cadmium jodyl benzoate  
4,4'- Dichloorbenzoyl peroxide  
Diglycol dinitrate  
Dinitroglycol (Glycol dinitrate)  
Ethyl nitrate  
Ethyl nitrite  
Glycerol trinitrate (Nitroglycerine)  
Hexanitrodiphenylamine (Hexyl)  
Hexanitrodiphenylamine, ammonium salt  
1-Hydroxy-1-hydroperoxy-dicyclohexyl-peroxide  
Jodyl benzene  
Mercury fulminate  
Mercury cyanide oxide  
Lead trinitroresorcinate (Lead styphnate)  
Mannitol hexanitrate  
Nitrocelluloses  
Pentaerythritol tetranitrate (Penthrite)  
Picric acid (2,4,5,-Trinitrophenol)  
1,2,2,4-Tetranitro carbazole  
Tetranitro naphthalene  
Trinitroanisole  
Trinitrobenzene  
Trinitrochlorobenzene  
Trinitrophenylmethyl-nitramine (Tetryl)  
Trinitrocresol  
Trinitroxylene  
Trinitroresorcinol  
2,4,6-Trinitrotoluene (TNT)  
Picric acid salts

**For the disposal of explosive substances, expert advice must be sought from the Safety Advisor ADR.**
